

SHAIK SHABIR

Software Developer — Java — Backend Development (Flask)

+91-6302343426 shaikshabir967@gmail.com linkedin.com/in/shabirshaik github.com/shabirsk

Summary

Final-year B.Tech student specializing in Java backend development with hands-on experience building scalable web applications using Flask, MySQL, and Supabase. Developed real-world projects involving REST APIs, authentication, and database optimization. Strong in problem-solving and backend system design, with internship experience in Java and full-stack development.

Technical Skills

Programming Languages: Java, SQL, JavaScript (Basics)

Frameworks & Web Technologies: Flask, HTML, CSS, JavaScript

Databases: MySQL, Supabase

Tools: Git, GitHub, VS Code, Eclipse, Postman

Concepts: Object-Oriented Programming, Database Management Systems, REST APIs

Internships

Java Developer Intern	Virtual Internship Program	Apr 2025 – Jun 2025
------------------------------	-----------------------------------	---------------------

- Developed CRUD-based web applications using Java and MySQL for backend data management.
- Implemented efficient database operations to handle application data processing.
- Optimized SQL queries and backend logic to improve performance and responsiveness.

Full Stack Developer Intern	Cognifyz Technologies	Oct 2024 – Dec 2024
------------------------------------	------------------------------	---------------------

- Built backend modules and developed REST APIs for efficient data communication.
- Implemented server-side logic to support core application functionality.
- Optimized backend processes and database interactions to improve performance.

Projects

Subscription Management System (Live Application)	2025
--	------

- Built a full-stack subscription platform with authentication, plan management, and tracking features.
- Developed REST APIs and backend services using Flask and Supabase.
- Optimized data handling through efficient database schema design.

Event Management System	2025
--------------------------------	------

- Built an event management platform enabling event registration, tracking, and administration.
- Developed backend services using Flask and MySQL for efficient data processing.
- Implemented authentication and CRUD operations to securely manage event and participant data.

Smart Irrigation Management System (IoT)	2024
---	------

- Built an IoT-based smart irrigation system using Arduino and soil moisture sensors.
- Monitored real-time soil conditions to determine irrigation requirements.
- Automated water flow control based on moisture levels, improving water efficiency.

Publication

Shaik Shabir et al., Eco-Friendly Plant Automatic Irrigation System, ICCSCE 2025, Atlantis Press

Achievements

- Lumen Hackathon Finalist – Selected among top teams for building a scalable and innovative solution.
- Smart India Hackathon Participant – Designed a real-world solution at national level, showcasing problem-solving and collaboration skills.

Education

B.Tech Computer Science and Information Technology	2022 – 2026
---	-------------

QIS College of Engineering and Technology	CGPA: 7.5 / 10
---	----------------
